Daily Summary

Heavy focus on AATC today, after spot checking areas down river and replacing booms at Valley Hill, Forest Parkway and Upper Riverdale Road.

1. Current total waste = four 20-yard bins

2. Recovery: No measurements taken today

Total Volume of Fuel Collected: NOTE: these are approximate figures and are subject to change. Total fuel volume was determined using manual tank gauging in the field with fuel-finding paste when the tanks are full. The frac tanks are positioned on an approximate one-foot incline, which may distort the calculated total volume. More accurate figures will be determined at the point of disposal.
