To: Tom Fowler tom.fowler@dnr.ga.gov

Mr. Fowler, please find enclosed the intake and output records for Renewable Resources in Valdosta, Georgia for the year 2020. Also, 2021 records through June. We have been sorting longer materials for forest product markets and grinding materials for landscape mulch. We are working towards meeting the specifications to produce biomass for Georgia Power in Albany, Gainesville Renewable Energy in Gainesville Fla and several forest products mills as hog fuel around South Georgia. The southern pile, that you were contacted about, is being ground for landscape mulch and is being sold to the general public by the bucket. As weather permits the materials are being converted as expeditiously as possible. Please let me know if there is anything else I need to provide.

Subject: 2020 yard totals
Date: Jul 27, 2021 at 4:15:05 PM
To: S Maine shermanmaine@bellsouth.net

Total wood debris intake : 1,757 yards +/-

(Yard formula used LxWxH)

Woody material converted to:

Round wood :735.08 tons = 1592 yards +/-

Mulch :300 yards +/-

Screened topsoil: 34 yards +/-

Incidental waste received:

8 cross ties

36 used tires

3 yards of broken concrete

103 lbs of metal

All incidental waste diverted to landfill except tires which were sent to Bear tire for recycling
