L Remarks:

Engine 4 was dispatched to 4473 Columbia Rd. for a fuel spill at the Circle K. Engine 4 arrived on scene and made contact with gas station manager. The manager stated that a person was filling up his car with fuel and some spilled on the ground. Fire crew noted that the meter read 22.9 gallons. Fire crew noted that there was no fuel puddled up and that all the fuel that had spilled was now located in the storm drain. Engine 4 requested 801 and county Environmental on scene. Fire crew spoke with the driver of the 2000 Chevy Monte Carlo that was involved. He stated that he just got the car and that this was the first time putting fuel in the car. He stated that the car was almost completely empty when he began filling. Research showed that the car may have approx. a 17 gallon tank. Fire crew determined that an estimated 7 gallons had spilled into the storm drain. 801 and Environmental Compliance arrived on scene. Fire crew pushed the leaking vehicle from the area. The vehicle owner was instructed to NOT drive the vehicle and he was to have it towed. Fire crew secured the area around the storm drain using traffic cones. 801 used air monitoring equipment to determine that there was no immediate hazard due to the strong winds in the area. 801 cleared the scene and went back in service. Clean up crew arrived on scene. County Environmental and the Cleanup crew stated that fire crew was no longer needed. Engine 4 went back in service with no further actions taken by fire department ...
