EXTERNAL MAIL: Caution Opening Links or Files

Mr. Kanard,

I asked my supervisor to look this over and we would like to get an estimated date of completion before we close this out. So, could you please add to this email with a completion date for each of these projects starting with the cleanup of the debris.

Thank you and if you have any questions or concerns please feel free to contact me

Good morning!

Based on our previous conversation the following conditions will be implemented to resolve the issue. Both myself and the Support Crew foremen have reviewed the site and have found several issues that will need be resolved. They are as follows:

- Debris removal and clean up
- Replacement and installation of fences and gates at 3 locations.
 1. Fences and gates installed on both sides of Blue Jay Rd.
 2. Replace fence and gate at Sandhill Rd.
- Culverts to be replaced that are damaged or need to be installed. The water is building up and not flowing out of the area.
- Access road to be enhanced and improved (gravel installed)
- Beaver dam to be removed – (Is there any permitting needed for this or just notify you?) If beaver rebuilds this, a trapper will be utilized to trap and relocate beaver out of this area.
- Evaluate where the mats have been utilized for egress down the property and see if any rectification is needed in order to remove the mats and make it passable.

Besides yourself I have received and have spoken to customers in this area that are concerned with the activity that is going on at this site. Law enforcement has also had issues at this location with trespassers entering the property and

doing things that shouldn't be taking place. Once the fences go up this property will then be posted and access restricted. I appreciate your help with this as we strive to correct the problem, hopefully the processes to get all this in place want take much longer. **The purposes completion date for this work is May 31st 2019.**

Thanks
